

# Powerful-Effective-Simple

DefenderMX is your best defense in the fight against Spam and Viruses. E-mail is essential in today's business world. Any interruption in this lifeline greatly affects your business. Get DefenderMX today and stop your losses. Your users, network, and bottom line will thank you for it.

## DefenderMX gives you maximum return on your investment

The DefenderMX incorporates advanced technology inside. Using today's advanced Open Source software and top-notch programming makes the DefenderMX unbeatable. DefenderMX is designed to give you peace of mind knowing your E-mail is fully secure!

## Enterprise Class Software

DefenderMX is designed to run itself. By not having to maintain the system constantly frees your resources tremendously. Our clients are constantly amazed by how little time they spend maintaining their DefenderMX system. By allowing individual users the ability to customize settings and release Quarantine items frees the Administrator even more. DefenderMX is the Commercial side of MailScanner Open Source Software. MailScanner & DefenderMX are protecting over 30,000 sites and processing almost 750 million messages per day. Order your Demo Unit or Download the 30 Day Trial Version today from [www.fsl.com](http://www.fsl.com)

## Easy Installation

The DefenderMX is a reliable and powerful spam blocking solution that is also extremely easy to install and maintain. From a bare metal server, you can have DefenderMX running in under 20 minutes. DefenderMX runs on your own hardware or can be purchased as an Appliance. Either option can be deployed very quickly and easily.

## Complete Solution

**Antivirus • AntiSpam • Directory Harvest Protection • AntiPhishing • AntiSpoofting • Denial of Service Protection • Outbound Filtering • RFC Compliant • Easily integrates with any mail server and network**

## AntiSpam
